

# Valuing Darkness

*Policy Symposium on light Pollution Reduction*

## Sponsorship Prospectus

**IALD**  
INTERNATIONAL ASSOCIATION  
OF LIGHTING DESIGNERS

## About the Symposium

**Venue - Victoria University City Campus**

**Dates - 11 - 13 September**

In September 2024 the Australasian Dark Sky Alliance (ADSA) in collaboration with the Network for Ecological Research on Artificial Light (NERAL), the Lighting Society (IES), and the International Association of Lighting Designers (IALD), is set to host a 3-day symposium with a primary focus on the impacts of light pollution. This face-to-face event will unite national experts, researchers, government, industry leaders, First Nations representatives and enthusiasts to address the urgent issue of light pollution. The meeting will aim to provide solutions tailored to the unique technical and marine and terrestrial environmental challenges faced in Australia.

The multidisciplinary collaboration and partnership of these hosts underscores the pivotal role of responsible lighting in minimizing environmental impact, reflecting a commitment to enhancing environmental biodiversity and sustainability.

### Program Outline

**11 September** - Full day symposium of speakers showcasing the global impact of light pollution for cultural connections, energy consumption, human health, wildlife and marine species, and astronomy. The conference will discuss sustainable solutions.

**Evening** – This multi-faceted family-friendly event will be hosted in the Royal Botanic Gardens and will explore the cultural connections, the benefits of preserving our natural night environment and allow you to stargaze and immerse yourself in the dark.

**12 September** – Hosted by the Australasian Dark Sky Alliance, government, industry, urban planners and businesses will meet for round table discussions with the view of implementing policy and planning strategies to reduce light pollution.

**13 September** - Collaborative workshops led by NERAL, fostering science-industry partnerships to advance technology and policy for the mitigation of light pollution impacts on marine and terrestrial wildlife.

By uniting Australian expertise and perspectives, the symposium aims to make a significant impact on the reduction of light pollution and foster a more sustainable coexistence between humans and Australia's unique natural night environment. Through this collaborative effort the symposium aims to leave a legacy that combats light pollution on a national scale.

## Your Opportunity to Make a Difference

We invite your organisation to join us as a sponsor for this significant event. By becoming a sponsor, you will not only contribute to the success of the symposium but also showcase your organisation's unwavering commitment to environmental conservation, reducing energy consumption, the preservation of astronomy, and the betterment of communities globally. Your support will be instrumental in achieving the symposium's goals and ensuring its impact reaches far and wide.

## What's in It for Your Organisation

As a sponsor, your organisation will enjoy a range of benefits, including prominent visibility and recognition throughout the symposium, opportunities to engage with thought leaders and decision-makers in the field, but most importantly, the chance to demonstrate your commitment to responsible corporate citizenship. Your involvement will be prominently acknowledged, and you will have the chance to shape the dialogue around light pollution reduction.

Welcome to the Illuminating Change: Policy Symposium on Light Pollution Reduction. This symposium aims to gather experts, researchers, and enthusiasts dedicated to addressing the critical issue of light pollution and implementing solutions. The key goal of this symposium is to drive outcomes and produce a blueprint for policymakers to reduce light pollution through commitment, the development of technologies, increased research, and public awareness-raising campaigns.

We invite your organisation to be a part of this significant event by becoming a sponsor. Your support will not only contribute to the success of the symposium but will also showcase your commitment to environmental conservation, astronomy, and the quality of life for communities around the world.

## Sponsorship Tiers

We offer five sponsorship tiers: Platinum, Gold, Silver, Bronze, and Networking and Public Outreach Event. Each tier includes unique benefits, enabling you to customise your level of participation and engagement with our symposium. We would be happy to consider further opportunities or discuss amending one of these existing packages.

### Gold Sponsor - \$5,000

- Half Page Ad: In the event program.
- Logo on Event Website: With a link to your website.
- 5 Complimentary Symposium Registrations
